AVIATION SECURITY (AVSEC) TRAINING

COURSE OVERVIEW/BENEFITS

This dynamic and innovative course is of enormous strategic and operational benefit to all Tech & Cabin crew and is based on real life high risk situations. The course will take delegates through some very tough decision making and will highlight the importance of observational awareness, effective communication, and team work under extreme pressure in a simulated environment. By default this course also provides crew with a better understanding of security and incident management in a port slip environment.

TARGET AUDIENCE

Private Charter Aviation Crew & Ground Staff

DURATION

1 Day (in the Hanger/on the Aircraft)

LEARNING OUTCOMES

On completion of this training course participants will be able to:

• Have an understanding of the latest aviation terror threats

• Have an understanding of core psychological disorders

• Recognise the trigger points for aggression and anti-social behaviour

• Be confident in dealing with aggression

• Know how to protect the flight deck and cabin

• Actively listen to and appreciate any suggestions or input from crew

• Communicate information clearly and effectively in a structured format that can be coded in a coded fashion whilst under pressure

• Work effectively and efficiently as a team in defusing aggressive situations (either in air or on the ground)

• Evaluate and prioritize action levels required to reduce or control a threat

• Engender respect with the ability to entrust others to follow

• Administer "Offensive Tactics" confidently using improvised defence techniques

MODULE 1
Aviation Terrorist Incidents

MODULE 2
Counter Threat Response Model (CTRM)

MODULE 3
Threat Fatigue

MODULE 4
I.A.M.O Assessment

MODULE 5
HOT Principle

MODULE 6
ZR's Security App (SecApp)

MODULE 7
Defensive & Offensive Tactics (Levels 1 – 5)
